world class instruction

This winter travel to Chile to enhance your kayaking technique. The Río Futaleufú valley is known for its world class kayaking. Less known is the brilliant turquoise to emerald colored water of its smaller teaching rivers: the Class 2/3/4 waters of the Espolon, Azul and Palena. Your class room will be these incredible teaching rivers and their majestic alpine beauty. Perfect surf waves, sand beach with calm water rolling pools, rapids to develop your river reading ability.

We analyze your needs and activate a plan to make you the paddler you can be. You will understand why Olympic kayaker and school director Chris Spelius and his dream team of instructors have made this river valley their winter's work and love. One to two week classes. Lodge and or Camp based. 1 to 4 guide to student ratio. Video feedback. Private instruction available.

"Give us one week with you and we will change your paddling forever!

Chris Spelius
